

Climate Wise

is a City of Seattle voluntary partnership program that encourages cooperation between public, private and non-governmental sectors to promote energy efficiency and environmental performance as a business asset.

Partners agree

to assess their business opportunities, invest in efficient equipment and practices, and share these achievements with peers and the public.

Seattle City Light

and Climate Wise Program Allies look forward to working with you to assess and take action on business opportunities that increase resource efficiency and reduce emissions.

A Climate Wise representative will contact you to discuss technical assistance and projects that interest you.

Climate Wise Partnership Agreement

As a Climate Wise Partner, _____ (company or institution name) recognizes the importance of voluntary partnerships to demonstrate local solutions to global warming.

We join Seattle City Light and other Partners committed to improving energy and resource efficiency, and reducing greenhouse emissions.

Climate Wise Partners agree to:

- Establish a process to identify and implement energy efficiency, waste reduction and other measures that support business goals and contribute to greenhouse gas emission reductions.
- Complete an Action Plan that describes Climate Wise commitments and implementation timelines. Review and update the Action Plan as needed, and strive for continuous improvement.
- Track, report, and inform staff and the public about Climate Wise activities.

We understand Seattle City Light can assist us to report greenhouse emissions on an annual basis using the U.S. Energy Information Agency's Voluntary Reporting of Greenhouse Gases program (Form 1605b).
